

# Third-Party Devices

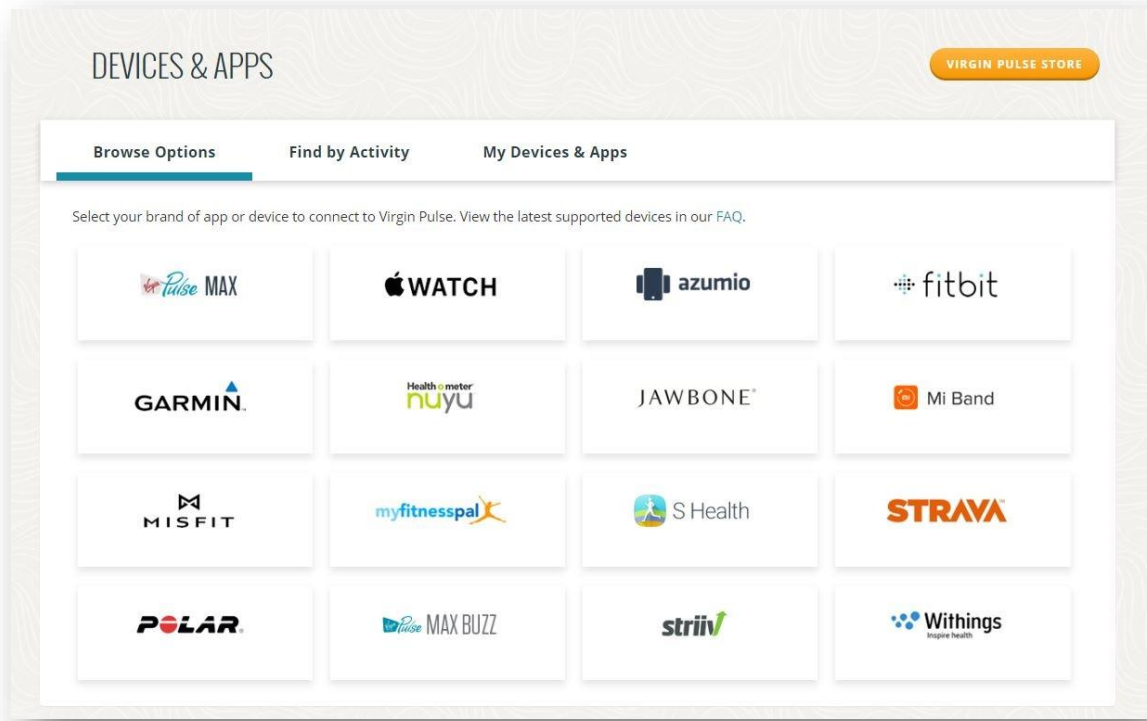

Activity Tracking

## What are Third-Party Devices and how do they connect with Virgin Pulse?

Besides Max Activity Tracker and Max Buzz, Virgin Pulse supports a number of **third-party** tracking **Devices and Apps**.

Most of the third-party Devices and Apps servers send the data to **Validic** which they then send to Virgin Pulse through **API connection**.

However, not all data is sent to Virgin Pulse - only that which is requested on Virgin Pulse side.
