VP Concierge Biometric Screening Services

Safe, reliable, and flexible solutions are more important than ever.

With 6 in 10 adults having avoided or delayed care during the pandemic, large percentages of member and employee populations have no knowledge they are at-risk or sick. There has never been a greater need for reliable health screenings and an increase in access to vaccinations. There's also never been more uncertainty around how to deliver them safely and conveniently.

Virgin Pulse Concierge Biometric Screening Services provide a simple, flexible solution to address this critically important piece of employee wellbeing. Whatever your goal, our approach alleviates administrative burden and uncertainty, and removes accessibility barriers for hard-to-reach populations.

A designated screening and vaccination coordinator will help you design onsite, offsite, or blended screening programs that meet the unique needs of your organization. Choose to offer biometric health screenings, flu vaccines, COVID-19 testing and temperature scans, or a combination – we'll collaborate to find the right set of solutions.

Virgin Pulse Screening & Vaccination Coordinators deliver safe, concierge services to help your team focus on people – not process.

Consultative Planning & Dedicated Support

Strategic recommendations and participation forecasting for onsite, offsite, and blended events

Custom program development and coordination through single point-of-contact

Onsite Event Management

Coordination and compliance across government, legal, safety, and regulatory requirements

Client-specific staff training and member support

Offsite Options

Lab vouchers through nationwide network of partners Home Test Kits

Verified physician forms, completed by member's own health care provider

Secure & Seamless Digital Experience

Secure data exchange; adherence to strictest privacy guidelines

Health data automatically populated both the online experience and member's health assessment

Actionable Insights & Analytics

Aggregate reporting for population health insights, risk areas and opportunities

Individual, post-screening results consultations for onsite event participants

Communications Strategy & Promotion

Custom campaign to engage all eligible employee populations

Registration monitoring, participant reminders

Personalized recommendations on benefits and programs that make sense to each person

Biometric health screenings generate vital information about individual health risks and opportunities, as well as valuable population health insights that can inform key business decisions like benefits design. Providing access to vaccines ensures the health of your population – and your business.
